

Stay With Me Tonight	One Chance (In Life)	One By One	Silent Partner	Forever!
I remember you driving close So close up to my window How you looked at me Than you smiled at me So I let my window down Your voice igniting a fire Burning inside of me I could feel the heat	Life opens every door In a second you will close it Your world is torn apart Nowhere to hide from Explosions of a heart Your all alone Nowhere to go	A Friday night I saw you standing there Looking so good Your eyes fill the air I walked up to you How you smile at me Asking me my name I knew our night... Would change	In the day... I feel so empty I go through a motion... Sadly I think of... Our possibilities How can I give up... On this ride so easily? A merry-go-round	When I saw you In a photograph Off the internet My heart was beating Like a drum
I gripped the steering wheel So hard Asking you... For your business card	[Chorus] Give yourself... One Chance (In Life) You'll survive Find a peace You will subside Just take... One Chance (In Life) Feeling lost and so confused I send out an S.O.S. to you A heart may stop! The beast stays alive! You need... One Chance (In Life) To survive	We danced in the night The moves in every way I cling to the words you whisper What did you say? Where do we start? You are the one for me Opening up my heart...	[Chorus] When I'm by your side I can taste it I touch your lips I will be what you need To be a Silent Partner	The day you called me On the telephone So magical It nearly knocked me... On the Ground
You said, "No! Get in!" So we drove around a while The many faces And South Beach styles How we pass them by Here on Ocean Drive Somehow I had to let you in Your eyes became my desires That's when it all began This night, could never end	I send out an S.O.S. to you A heart may stop! The beast stays alive! You need... One Chance (In Life) To survive	[Chorus] Here we are One By One I feel you close To a summer sun The heat is on One By One Here's a special kind of love When we touch The magic starts The heat is on One By One	How I live my life... So lonely I'm so insecure... It kills me I light up a cigarette... I cry Asking myself how I can keep Riding on A merry-go-round	[Pre-Chorus] Energy is flowing I'm dropping to my knees I see you there You're everywhere And there, you, again Recurring in a dream Releasing me... possessing me...
[Chorus] And then you wrapped one arm Around me You whisper softly On my ear Stay With Me Tonight It feels so good To hold you tight You said, "Come closer to me" And look in my eyes We could be making love, if you... Stay With Me Tonight	In this game against the weary You find a strength you need Your world is torn apart There's nowhere to hide from Explosions of a heart Your all alone Nowhere to go	The lights above They shine on you and me They shine with a purpose We are meant to be Reaching out And holding on to you What are we going to do?...	[Chorus] The air we breathe together Makes it feel... Like this could be forever I will be... What you need to be A Silent Partner	[Chorus] Forever! You! Forever! Me! So close to me It's all for you! It's all for me I can't resist The energy Wrap-Your-Arms-Around-Me Forever!
As I walked up to your flat My heart was racing My pulse embracing Everything I could have Take it to the next act Guiding me through the door Your eyes Of passion controlling me I just wanted more Now you close the door	[Chorus] Cry... You sigh...You fight (I cry) Nowhere to hide from Explosions of a heart Your all alone Nowhere to go... Feeling lost and so confused I send out an S.O.S. to you A heart may stop! The beast stays alive! You need... One Chance (In Life) To survive	[Chorus] [Bridge] And, don't be afraid Of what tomorrow brings The challenge is ours You're my everything...	[Bridge] I will be... What you need to be A Silent Partner "To have you hear... You make it so very clear" To be... What you need	The way you touch me With your fingertips You touch my lips You ignite... A flame in me
[Chorus] [Instrumental] [Chorus]			[Outro] I will be... What you need to be A Silent Partner You make it so very clear" To be... What you need	You are the key That opens up my heart Don't let it stop I surrender... To the end
				[Pre-Chorus] And, there, you again Recurring in a dream Releasing me... possessing me...
				[Chorus]
